Lubrication Work Center shown with optional Storage Cabinet.

Bulk Storage

Color-coded bulk storage keeps your storage area neat, safe, and free of messy 55-gallon drums.

- Choice of OilSafe filtration, 25, 7 or 4 micron rating
- Modular and scalable, the unit can be configured to your exact needs
- Arrives pre-assembled for easy setup
- Each tank has its own dedicated pump and filter to prevent cross-contamination
- Built-in Spill Containment to meet your regulatory needs

Transfer Containers

Precise-pour transfer containers eliminate spills and slowdowns.

- Ergonomic hand pumps
- Push-button air intake valves
- Quick twist spouts for fast, smooth pumping and pouring
- Fully interchangeable drums and lids- in 10 different colors
- Robust design for extensive service life

Identification

Customizable labels integrate the entire system to ensure every lubricant goes in the right place — from Bulk Storage to the Transfer Container to the point of application.

- Fully customizable content
- Meets OSHA compliance with Right to Know
- Improves productivity and efficiency
- Variety of label sizes and media to meet all of your Identification needs

OilSafe® is the only reliable choice for smart, safe storage and transfer.

The OilSafe lubrication management system establishes best practices throughout your workflow. Every step is color-coded to eliminate risk and human error - simplifying maintenance extending the life of the machines that make your product. And keep your business running.
